## Basic farming techniques are timeless

Terra Biossa® is an all natural soil amendment used daily by conventional and organic growers and farmers who are passionate about growing life giving food with life giving methods.

Terra Biossa is a fermented liquid made by a community of active food-grade bacteria, predominantly lactic acid producing and Nitrogen gathering ones, that have been infused with organic molasses. Terra Biossa is manufactured (non GMO) in Canada and in addition to being OMRI Listed, only utilizes US GRAS (generally regarded as safe) listed ingredients. Basic farming techniques are timeless compared to modern techniques. Terra Biossa, a biologically safe and essential component in basic farming techniques, vitalizes and conserves soils natural ability to produce nutrients. The scientific term is "to reestablish the ecological equilibrium within its recipients".

Billions of viable bacteria are relentlessly attuning soil nutrients to match the exact stage of development of each plant. Depending on soil characteristics, with the addition of Terra Biossa, it's necessary to either reduce or eliminate the use chemical fertilizer and to generally restrict the use of other soil and plant enhancers. This is a wonderful cost benefit to operations.

Terra Biossa is a natural pesticide and herbicide and it suppresses germs and pathogens. The heat producing bacteria provided by Terra Biossa protect against the negative effect of night frost. Applying Terra Biossa allows crops, fruits, vegetables, berries, flowers, trees and plants to concentrate on growing quantity and quality without having to spend energy on fighting disease. Terra Biossa's anti oxidative properties make your harvest stay fresh longer "extending shelf life".

### Healthy soil produces productive farmland, vital lawns and beautiful gardens.

#### Economy

Terra Biossa has the potential to expand your profitability above and beyond.

#### Some peripheral benefits

- More resistant to physiological growing factors
- More resistant to processing and shipping stress.
- Field experienced customer service
- Safe for health and environment
- Reduces CO<sub>2</sub> emission
